

About Programmes

The programmes conducted by us are designed to enable students to gain comprehensive knowledge and understanding of the scientific and technical underpinnings of Hospitality and Catering education. They progress from a broad overview to a deeper understanding of the main disciplines, followed by more advanced studies and specialization through industrial exposure. All the programmes conducted by us are overseen by an Industry Advisory Board made up of professionals from across the spectrum of the Industry.

In the dynamic environment of our Institute, students receive not only the basic practical skills that are expected of any Chef, F&B Service Expert or any other hospitality professional but also the tools and training required to create original new recipes and techniques of handling guests, at both national and international level. The Institute has a versatile system for training future professionals and entrepreneurs for succeeding in today's exceedingly competitive and rapidly changing environment. The environment encourages students to invest their minds in classrooms and their talents in extra-curricular and co-curricular activities, leading to their all round development.
