

## INDUSTRIAL VISIT : PREETI INDUSTRIES

Date: 13<sup>th</sup> March 2018

Industrial visits are an effort to bridge the gap between classroom learning and practical exposure. To help students gain first-hand information regarding functioning of the industry, **MBA 2nd** semester students of **Faculty of Commerce & Business Management** were taken on an industrial visit to "**PREETI INDUSTRIES**", Lamachaur on Tuesday, 13<sup>th</sup> of March. Preeti Industries is a small company which produces non-woven polybags. The students were accompanied by Dr Garima Jaiswal Chandra & Ms. Farah Naeem.

The students were amazed to see the systematic management within a small infrastructure. The students enquired about the whole processing system of the woven bags. They gathered information about all kinds of non - woven bags that were being produced over there as well as the processing unit of the industry. The students witnessed the Batch Processing system in the industry and also saw how the waste residual was recycled and not disposed which highlights the optimum utilization of resources.

In all, the students became more aware of industry practices and were overwhelmed for the knowledge they acquired throughout the trip.
